

Nog een aantal nieuwe MeSH-terms die met ingang van 2017 beschikbaar zijn:

*Vaccination Refusal*

Refusal to receive vaccination.

*Apartheid*

A former political system in South Africa which enforced segregation in all forms, including physical, political, legal and economic discrimination, against all non-white, non-European racial groups.

*Degloving Injuries*

Avulsions of the superficial tissues of skin and subcutaneous tissue from the underlying fascia.

*Stair Climbing*

Ascending or descending stairs.

*Conservative Treatment*

Therapeutic approaches that are limited, gradual, or well-established as opposed to radical methods.

*Bathroom Equipment*

Receptacles used for collection of human excrement.

*Buttermilk*

A beverage made from cow's milk fermented by lactic acid-producing bacteria, especially lactococcus lactis and lactobacillus bulgaricus.

*Kefir*

A beverage made from milk fermented by a mixture of endogenous lactic acid-producing yeast and bacteria (kefir grains), many of which are probiotics. It should not be confused with kaffir lime or kaffir corn.

*Calendars as Topic*

Works about documents or charts that show days, weeks, and months of a year.

*Postcards as Topic*

Works about cards on which a message may be written or printed for mailing without an envelope.
